Summary of Information

The overall attitude on the vessel for this trip is that it will be "easy sailing" because of the American authority's emphasis on the Middle East situation. Contraband narcotics are present. They have been packed within long tubes reminiscent of those used as the cores for rolls of carpet. These tubes are 6'-8' in diameter, 6 paces long and made of a very hard material. They are stacked in a cage-like rack. This rack is located just below the corner where the port side hull and the deck meet at mid ship. A catwalk or walkway runs along side and parallel to the rack. This rack sits on top of a larger tube/duct which has contained motion within it. The floor of the walkway and the surface in which this larger tube/duct sits upon are one in the same. There is a rather "cavalier" attitude in the attempt to hide the narcotics. A man named OSCAR is associated with the drugs. His job/he is known by the phrase of a "typical 'hatch' guy". There are smells of food cooking, particularly chicken soup. There is also a musty and dirty smell present. The phrase "off in bay..." is also associated with OSCAR.
